

I AM THE NCR SelfServ™ 31

Interior Freestanding Slimline Deposit/Recycle ATM

Make deposits easy for your customers

Suitable for any indoor location, the SelfServ 31 is a compact ATM that can be configured for intelligent cash deposit or cash recycling plus a wide range of revenue generating services like bill payment. Your customers will like the simple and clear user interface that makes even the most complex deposit transactions easy to perform.

Proactively fixes itself

Keep your ATMs up and running, offering your customers the transactions they want, when and where they need them. NCR's express recovery and self-healing technology reduces downtime from hours to minutes—making your ATMs available around the clock.

Keeps you informed

Successful network management is about having the right information at your fingertips. NCR SelfServ ATMs provide data in real-time on configurations, software versions and the activity levels of each module. So you can see, understand and control your entire network—and make more empowered decisions.

Inspire trust in your ATM network

Our SelfServ ATMs are designed to defend against known and unknown fraud attacks, even before they start. Ask us about our multi-layered approach to ATM security including logical and physical solutions. For example Solidcore Suite for APTRA™ protects against the execution of unauthorized code on your ATM network and our Skimming Protection Solution protects cardholder data from card skimming attacks.
