

### **The FinTech 100 List**

NCR ranks 4th

NCR has moved up to 4<sup>th</sup> in the Fin Tech 100 ranking system which documents the contributions of technology vendors to the financial services industry worldwide. It is not surprising that NCR ranks in the Top 5 when you consider that they are the world leader in consumer transaction technologies and the largest provider of ATMs.

It should also be noted that NCR is increasing its emphasis on software, with software and related services now almost 20% of its 3 Billion Dollar financial services business.

In an effort to provide new software platforms to help banks and credit unions unlock their full potential, NCR recently acquired Digital Insight and Alaric Systems. These new acquisitions will help financial institutions leverage mobile technologies for their customers and staff to make every day transactions easier and more economical.

Recently NCR introduced APTRA Interactive Services installing APTRA Interactive Tellers in 60 banks and credit unions in the United States. APTRA Interactive Teller lets live tellers remotely control the ATM and talk with and conduct transactions with customers via video.

Informa Business Systems is the only Distinguished Partner of NCR in the State of Michigan and like NCR we are very interested in what the next ten years will bring to financial services technology.

We are focused on providing to our clients the right combination of meeting their customer's needs while containing costs to improve financial performance, all the while managing regulatory mandates and economic cycles. With NCR and Informa Business Systems you will be able to count on the services and expertise you need to stay at the forefront of the ever winding road of changes

We are committed to making every customer interaction an exceptional experience by providing faster and more convenient options backed by our world class security.
